

GIRAFFE PROFILE

Mahali

Scientific Name: Giraffa camelopardalis reticulata

Common Name: Reticulated giraffe

Sex: Male

Birthdate: May 10, 2003

Parents: Dam - Becky
Sire - Laikipia Sr.

Birthplace: Cheyenne Mountain Zoo

Weight: 1,802 pounds (2018)

Identification and Characteristics:

- He is lighter in color than the rest of the herd and is one of the tallest.

Socialization, Temperament and Behavior:

- Mahali is generally calm but can be pushy toward other giraffe. He loves to train, so he nudge others out of the way to get an opportunity to work with keepers.

Known Behaviors:

- Target, back up, down, left and right foot, touch, curl, X-rays

Rewards:

- Mahali will take crackers and romaine as reinforcers.

Reproductive History:

- Mahali has not sired any calves and is neutered.
