

# Potato Cutlery

## Biodegradable Utensils (Heat Stable)

Your food comes from nature and now so does your cutlery. Compostable Potato cutlery has the same look and feel as medium weight plastic cutlery but is much more environmentally friendly. To make this cutlery, we ferment Potato Starch, add some natural stabilizing products and mold the final product. Potato cutlery has a shelf life of over two years but will fully biodegrade in your compost bin in less than two months. Thank you for your support buy purchasing these wonderful products.

### Features and Benefits:

- Made of Renewable Resources
- Saves oil
- Heat Stable up to 220 degrees Fahrenheit
- Composts in 45-180 days in a commercial composting facility
- Price competitive with standard petroleum plastic cutlery
